

**SUPERCOMBO**

Mash 1 - 4 =  
Fancy Turntable Stop

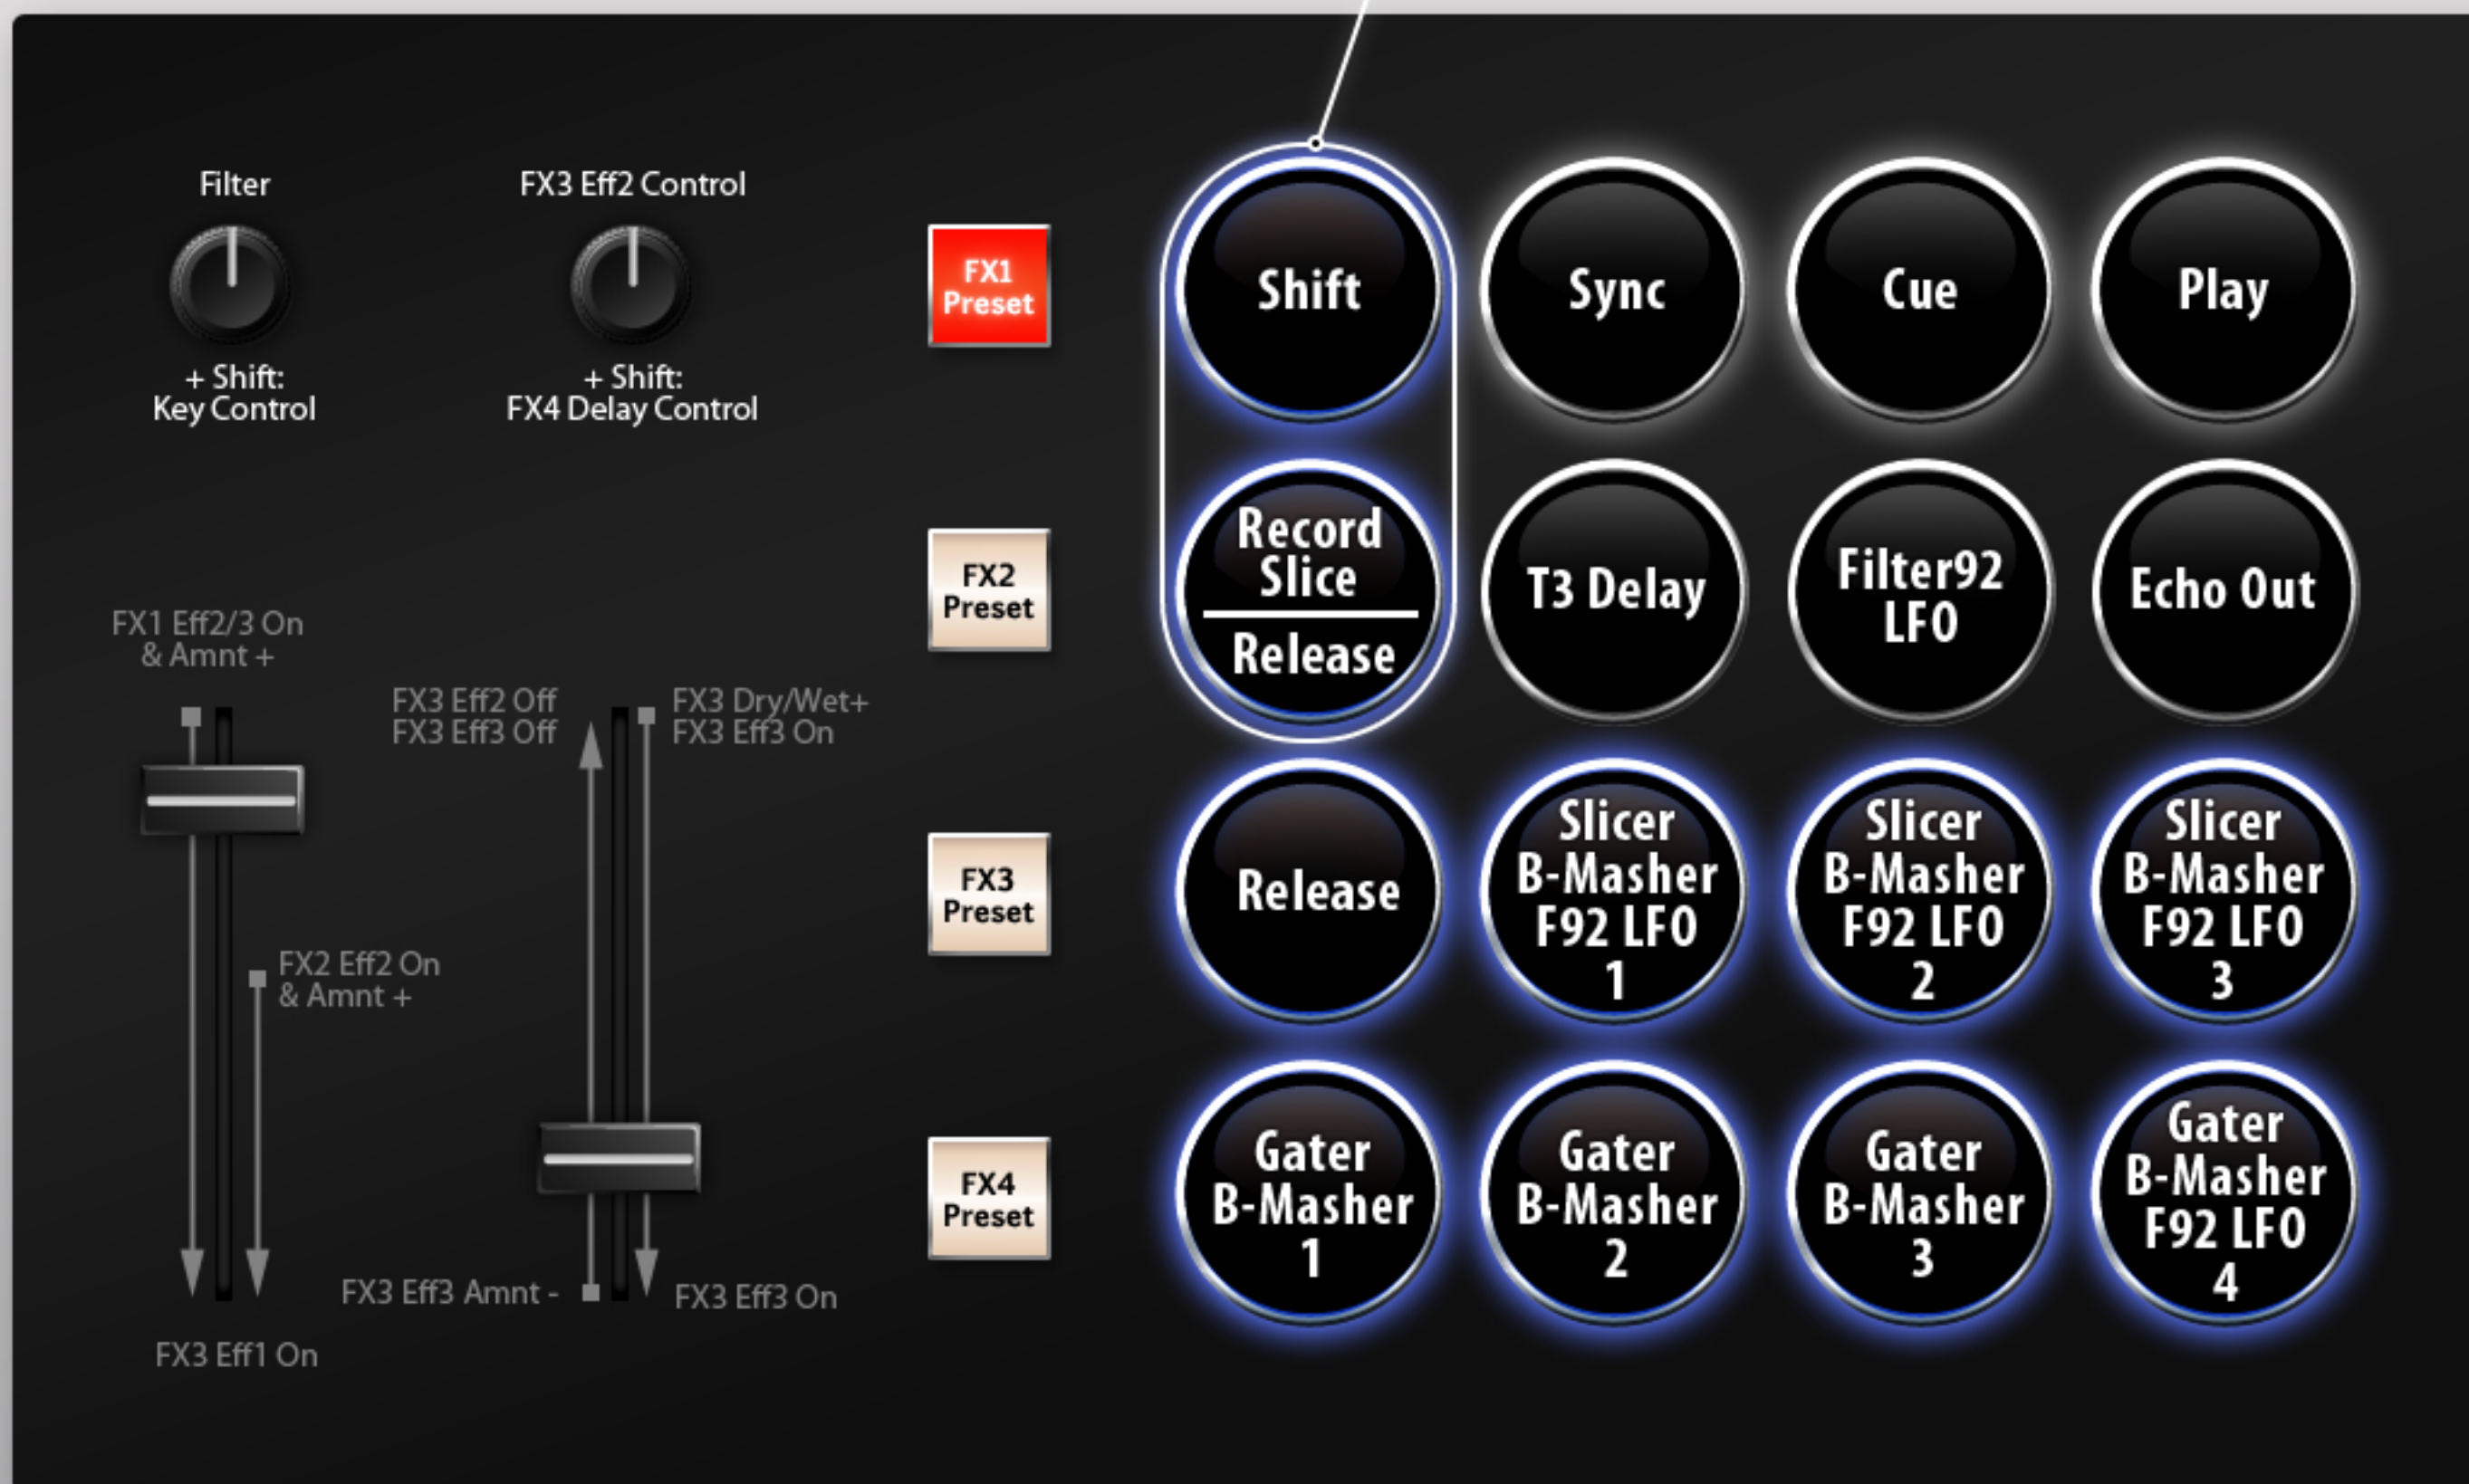

Shift + Record Slice = Cue Point 1 - 8 On/Off

Shift + Sync = Switch between Deck A and B

If Record Slice is already active press Shift and Record Slice again to activate the Gator and Slice Mode! • A eight bars loop will be activated and you can play with the Slice and Gator buttons!

\* You have to press the button twice to activate! \*\* Before the first use of the Turntable Stop FX you have to press the button once for eight bars!

The interface features several control elements:

- Sample Deck Filter** and **Sample Deck Volume + Gain** knobs at the top left.
- FX1 Preset** (orange), **FX2 Preset** (red), **FX3 Preset** (orange), and **FX4 Preset** (orange) buttons.
- FX1 Eff2/3 On & Amnt +** and **FX2 Eff2 On & Amnt +** vertical sliders.
- FX3 Eff2 Off**, **FX3 Eff3 Off**, **FX3 Dry/Wet+ FX3 Eff3 On**, **FX3 Eff3 Amnt -**, and **FX3 Eff3 On** vertical sliders.
- FX3 Eff1 On** button.
- A 4x4 grid of FX buttons:
  - Row 1: One Shot A-Slot 1, One Shot A-Slot 2, One Shot A-Slot 3, One Shot A-Slot 4
  - Row 2: One Shot B-Slot 1, One Shot B-Slot 2, One Shot B-Slot 3, One Shot B-Slot 4
  - Row 3: Gater\* 1/8, Gater\* 1/16, Gater\* 1/32, Dirty Echo Out\*
  - Row 4: Slicer Fun\* 1, Slicer Fun\* 2, Slicer Fun\* 3, Turntable Stop\*\*

## Instructions

1.

**NOTE: This is a 2 Deck Focus mapping. To move the Deck Focus around, Press the Shift button + the Sync button. "Focus" will move from Decks A->B->A.**

Please use the Large Import button on the bottom left section of the Preferences window to import this mapping. After doing so, please go into the Controller Manager section of Preferences and set the appropriate In-Ports and Out-Ports for your MF Pro Cue Master. The core 4x4 arcade button part of this mapping takes concepts from both the Deckalized mapping and the Instant Gratification mapping; however, it is not a direct combination of both. For example, Shift+Record will still trigger Juggle Mode when not "Recording". However, if you press Shift+Record while "Recording" you will find that the "Sample Slicer" functionality has dramatically changed.

2.

**NOTE:** To install the **Metatroniks Extended Mapping** use the Add... function in the Device Section and Import the **MF Pro Extended.tsi**.
